 SUPERVISORY PATENT EXAMINER  
 TECHNOLOGY CENTER 1700

*Reasons For Allowance*

1. The following is an examiner's statement of reasons for allowance: the examiner agrees that, in view of the 1.132 declaration filed 7/31/2006, applicant has overcome the *prima facie* case of obviousness in view of Sircar, as well as the rejections in view of JP'831, JP'139, Iwai by the instant claim amendment. More particularly, in the 1.132 declaration filed 7/31/2006 applicant has shown the reduction taught by the closest prior art of Sircar would not provide the microstructural characteristic of Ti base compounds  $\geq 10\mu\text{m}$  aggregated in a single crystal grain. The prior art does not teach or suggest an Al-Mn-Ti-Fe alloy processed substantially as presently claimed, complete with the presently claimed microstructural characteristic of Ti base compounds  $\geq 10\mu\text{m}$  aggregated in a single crystal grain, obtained by a critical method of deformation within the instantly claimed parameters.

*Conclusion*

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
